& greater reaction & more rasy
blood - Spring pleurisy after fall
intermittent

Notes of
Lectures on the practice
of physic - began Jan^y 4th
1788 in the University of
Pennsylvania. —
Began again Jan^y 7th 1789. —

+ It ~~was~~ may not be unwise to enquire
into the final causes of diseases. Why
is so much evil inflicted upon us?

Are not the evils to which we are ex-
posed from moral-^{& other natural} political causes
such as heat-cold-tempests-Quarta-
-quaries-famine-& poverty sufficient
without the addition of bodily pain-
& disease? - And if death must be the
necessary & inevitable portion of all man-
-kind, why do ^{we} not descend into the grave
without ~~these~~ ^{the} instrumentality of so
much pain & distress? - I apprehend
good reasons may be given from
this part of the physical evil of the
World. 1 Diseases lead us to
the study of anatomy & the
knowledge of the ~~low~~ structure of the
human body in which we discover
infinite marks of the wisdom and

The Practice of Physic is that branch
of medicine which treats of the causes
& cure of diseases. —

A Disease is that condition of
the animal body in which the actions
are not performed at all, or per-
formed with difficulty. +

The causes of diseases are divided
into remote - predisposing - occasional
& proximate. 1 9th Cold or contusion
a remote cause of pleurosy. 2
plethora the predisposing cause of
Hæmoptoe. 3 violent exercise the
occasional cause of D. L. Spasm
the proximate cause of pleuro-
sy, & rupture of blood vessel of
Hæmoptoe. all links of one

Goodness of the supreme being. without
such an object as the removal of
diseases or the preservation of health,
who would ever submit to the least
- some task of disputing dead bodies -
a business ^{as} is entered upon wth horror,
& rendered tolerable only by habit -
or necessity. 2 Diseases lead us to
study the works of nature in the
Vegetable - ^{Animal} - ^{Mineral} - Kingdoms th without
them we should have no botanists
- Chemists - or Naturalists - These have
all been physicians - & the works of na-
- ture in these kingdoms - w^d have
been ² unknown - ¹ unexplored - &

undiscovered by the children of men.
3 Diseases furnish excellent opportunities for the
^{expression & improvement of the} ~~study~~ ^{mental powers} of the human mind.
Here I would have ~~no~~ but few
opportunities without diseases for
the exercise of that humanity &
clemency which is the perfec-
- tion of our natures, & which cause

chain - proximate the last link.

A symptom is an apparent deviation from ordinary health, & is always obvious to the senses.

Symptoms are of three kinds
1 Symptomata morbi. 2 Sympto:
mata cause, & 3 Symptomata

symptomatum. The first are symptoms of the proximate cause.

The 2nd are symptoms of the re:
mote cause, the 3rd proceed from

both, & are secondary. E.g. pain

fever & cough are symptomata

morbi. If coryza, or angina

attend, they are symptomata

cause remote - The difficult

respiration is a symptom of a

us to resemble the great father of
mercies. Hospitals & Dispensaries in-
clude a large portion of human
misery. If these were abolished, - ^{human} ~~our~~
^{virtue} ~~nations~~ would languish for want of
opportunities to display the celestial
& godlike virtue of charity. ~~Disorders~~ ^{Disasters}
~~are necessary to impart a relish to~~
~~the ⁵ ^{as} ~~slipping~~ of health.~~ The painful
heats of summer & colds of winter are
necessary to ~~is~~ render the temperature
of spring delightful - ^{as} Darkness gives
odd charms to light - ^{as} Deformity ^{renders} to
beauty captivating - ^{as} Evil ^{is} & horror are
necessary to lead to good & to ^{as} ~~truth~~
error serves only to enhance the love
& charms of truth. ^{to} In like manner
Diseases are ^{by way of contrast} necessary to impart a
relish for health. & Diseases render
our passage out of the world less terri-
ble both to the sufferer - & less distress-
^{=ing to}

Symptom viz - of pain.

Diagnosis

Those symptoms which taken collectively form the distinction of diseases constitute the diagnosis.

E.g. acute pain - cough - high fever - We distinguish a pleurisy from a rheumatic pain in the Side.

Prognosis

is a declaration of the issue of a disease taken from the state and degrees of the symptoms. arose from times when the office of priest & physician were united.

In acute diseases uncertain - in chronic more certain. The prognosis taken from pulse - Urine - breaths - eye - face -

7th Lastly

Survivors, & ~~they~~ ^{upon the moral faculty, they} by their physical influence improve human virtue & happiness. — We learn from this view of this subject. — 1st The necessity — dignity — and Usefulness of the profession of Physic. & 2nd That "all partial evil is universal good" all discord — harmony — when understood. — ~~Physicians~~ ^{Physicians} are led by it — this natural & moral Avenue to the great Source & Centre of all wisdom & happiness. — ~~and~~ ^{They} ~~some~~ are in a peculiar manner the priests who minister ^{at} upon the Altar of the great temple of nature — ~~they~~ ^{They} handle the furniture of this temple, & like our first parent — ~~they~~ ^{they} give names ~~and we interpret the language~~ to every article in it. — ~~For~~ This view of our profession sh^d excite us to study to enlarge our qualifications for it as well as to discharge all its duties wth fidelity & diligence. —

Indubious - state of mind &c. from
the pulse doubtful - Cullen's Decla-
-ration of on Solano. Great
Caution & prudence in predicting
the wents of acute and most chronic
diseases necessary. - See below.

+ Indications of Cure

founded on a knowledge of a
proximate cause. Eg: Incessing
pleurisy - the first thing to be done is
to remove Spasm on w: pain - fever
& inflammation depend.

+ Diseases are Idiopathic, Sympto-
matic. Eg: Angina, & Globus hysteri-
cus. ~~typical~~ -

Diseases are natural, & Arti-
ficial. The 1st are chiefly fevers. 66,000
out of an 100,000 in Copenhagen

+ The effects of heavy - arms of
arts-manufactures - & studious
professions.

time in London ⁵ - now only 10,000 out
of 100,000. Times old age - Casualties
from prisons & accidents the only
natural outlets of human life.

Artificial diseases the offspring of
civilization - as neuroses - very
numerous. Indications of cure +

Remedies are ^{page 4th} - natural & artificial.

1 power of nature what? Read

Oration on diseases of Indians p. 42

2 Artificial taken from the
Materia medica - Cullen's best.

Division of diseases necessary
and useful as in Botany. wished for
by Sydenham - begun by Sauvage -
completed by Cullen's Shorten's study
- gives perspicuity -

On the pulse

1. Should be felt w. the fingers
- pulse there least perceptible.

occasioned by debility - Spasm - &
reaction. The cold fit & Spasm part of
the virus nature & medicaments.

nervous - articular - & fluids affected.
on the first - by leucative - 2nd Stimulating
& 3rd Septic powers. hence nervous
inflammⁿ & putrid fever.

Remote causes

1 miasm & human effluvia. The
first miasmata - the second contagion.
remarks on them

1 peculiar to human species. Does
bubed sores at marseilles without
touching the plague.

2 peculiar to animals & not men.
other
Two cases in Ratty of both by catarrh

3 peculiar to descriptions of men.
as negroes don't take yellow fever

Dr Lining. In Virginia negroes &
whites distinct diseases. The same
of Indians & whites at Nantucket
& Martha's Vineyard. +

* Does not this analogy extend thro' all nature? mixture of heat & cold produces inflammⁿ. - D^r of best dry & moist air, other diseases - equable weather always healthy. -

+ It is remarkable that leaving an impure & going into a pure air, often occasions fever. Hence we sicken after being in a foul air - when we go out of it. See air - See Prival's fact. mixture of airs hurtful. x

o Wm Coopers fact at Burlington.

b. L. by frost & heavy rains. Raining seasons always healthy. Short Ruddy & Winttingham

4 familiar to children & not adults.
It to children of different ages.

5 produced by heat & moisture -
no sickness when ponds - rivers &c
wholly overflowed. nor when
overflowed without heat succeeding.
as in meadows below Philad^a -

6 produced by cutting down trees
between inhabitants & ponds or
rivers - hence their increase by
clearing & denudation by culti-
-vation as in Pennsylv^a & Connecticut.
How destroyed?

1 By fires - where ~~are~~ are they -
animals - & have they wings?

2 By trees imbibing &c 3 by sulphur^{moderate}
or gun powder - 4 Vines or 5 fish air.
6 Hanging flies - mad? & 7
Genus Lep common in Britain

+ Jail fever known only in
British dominions - why?

perhaps more animal food eaten
there. white washing prevents it.

+ plague unknown where
sugar is used in diet.

good color w. ^{the} fallen supercil: look
bad. ~~small~~

ears - Deafness good & bad
2nd worst - Lind says rather good
+ Countenance - facies Hippocratica

- & face resembling ancestors -
"Hippocri: face." Sharp nose - hollow
eyes - fallen temples - cold; contracted
ears w. ^{the} lobes inverted - skin of
the forehead hard - stretched & dry - whole
face pale - or black or livid - on
like lead" - ~~but~~ fatal - unhelpful
but on by violent purging. -

than formerly owing to agriculture
 more sugar # & better
 horticulture - less animal food -
 prepared. in cities - jais to see Howard
 more cleanliness - ~~to liberty~~ - more
 parts of
 common in America - owing to clearing
 increase of mill ponds - variable quantities
 of rain. ~~from~~ 2 cold. & 3 fear -
 hence most prevalent at first - here physicians
 operate with other causes. All
 of course escape them. Dead bodies no not infect with
 the plague. even factor from grave
Prognosis yard - gr. of lymphoma -
 from Howard. -

Critical days - - After with debi-
 lity ~~the~~ ^{after} the 11th day to the quarantain
 by Deslauriers's remark of 336 hours for every
 type. - The use to be derived from a
 four - a quarter 6 months. then 1st.
 Knowledge of them in applying blisters &c.

Signs - Decubitus - Side best -
 legs raised & lying on back bad signs
Eyes - natural - best - tears bad -

in water - Tamarinds &c. -

In 15
The cure of continued fever.

The Indications are,

1 To moderate the ~~action~~ violence of reaction -
which may be done, by

1 Diminishing the action of the heart & arteries

a: avoiding or moderating those irritations
which are almost constantly applied to the
body; as a. The impressions made upon our
senses, particularly,

a Increased heat, whether arising from

aa: External heat, or,

BB. The accumulation of the heat of the body ⁽¹⁵⁾

b The exercise of the body, (c.)

c The exercise of the mind, d,

d The taking in of aliment, e,

e Particular irritations arising from

a The force of thirst, (f)

B Cruditie, or corrupted humours, in the stomach

& The preternatural retention of feces,

191 Arterial tension depends
on 1 original Stamina 2 great
bracing powers in cold Exercise
3 Quantity & 4 Quality of Aliment.
5 focus in the alimentary canal.
6 State of the Uterus - most tension
in menstruation & pregnancy.

P.S. proper 1 in all ages - in
Infants as well as old men. I once
held a child of 3 months old 3 times
in a plenary. - 2 at all times
in women even during menstruation
3 In the arm. no revulsion - Ergo
not proper in the foot - further
improper ^{1st} Because it exposes to
more cold. 2 cannot judge of the
quantity taken 3 cannot judge

S A General acrimony of the fluids.

B Employing certain sedative powers; as,

a. Gold.

b Refrigerants; the chief of which are,

- acids of all kinds,

B Neutral salts,

γ Metallic salts.

c Diminishing the tension & tone of the arterial system, by

a Blood-letting (g)

b: Purging.

2 Taking off the spasm of the extreme vessels ^{which are not relieved by bleeding.} by -

a: Internal means; which are,

a Those remedies which determine to the surface, as -

a Diluents

a: Neutral salts.

γ Sudorifics - between blankets

δ Emetics (h)

b. Those remains named antispasmodics.

of the quality of the blood - because
blood flows in the water. 4 There is
danger of wounding a tendon of the
foot. 5 The system is too much dis-
-turbed by it.

Blood sh? always be drawn plena
vires, & in a recumbent posture
as fewest muscles act in that
position. Coagulable Lymph
like a sand box & yellow serum
indicate great inflammation Diathesis.
Quick pulse suspected.
1st Tonic Emetic -

(i) ^{proper in bilious Vomiting}
How act? as Antispasmodic -
evacuants - & inevitable habits as
Stimulants - Shd. lie on till they draw
& no longer - Muslin useful, &
diluting drinks to prevent Strangury.
cured by dd: Cabbage leaves offensive
early chiefly - drawing not
often necessary - Cutting off the
entire impurities. Shd. be applied

B External means; as,

2 Blistering; f^{r} 1

b warm bathing. (k)

II

To remove the causes, or obviate the effects, of debility, by
Lying in bed -

1 Supporting & increasing the action of the heart and arteries - by

a Tonics, as - heat - fresh air

2 Coffee - (l)

b Tonics medicines, which are either
Grossil, as

aa Saccarum saturni, &c. or, -

5 Vegetable, as,

as: Peruvian Bark. (m)

B Stimulants, as, (n)

1. aromatics, &c. (o)

b wine.

(p) blisters - ^{opium &c. remarks &c.}

Here bring in Febrius called
intermittent, cured by Blisters.

soon - too weak in the lower degrees of Deb.
- hence called extreme Yunction by Dr Brown
when painful - sometimes necessary.
1/2 not often used. -

(L) Cold - 2nd week's case - Russian
method etc -

(2nd) n. - o) n. + all pleural & of the
but sh^d be changed. He
same class - Bath by Clyster -
bath - cataplasm - Dr. Broadbent's case.
It by the mouth - no regard to in:
dermipion - always proper on the
14 day. Sal Vol: - or Sal ammon Zi

The last 4 1/2 mg of 4301: vi - Opium -
Fothergill's Pulvaration -
wine - from 4301 to 4302 in the

Gibbon's cage - Madeira best -
 continues to the feet of ga. lie &c
 nervous & partial often connected.

If the above remedies more certainly
necessary in the latter case. *en. m. b. d.*

the ^{on} ^{mostly} railing goes w: leaving this up
(9) by opening windows be things of

Willows - Common Salt is ^{the} found
on it. & by Vinegar -

of the utmost consequence, elevating man to the highest station.

S - t, Bay Lornits - purges in the beginning
of all putrid fevers - often cures them

To obviate or correct the tendency of the fluids to putrefaction, by

I. Avoiding the application of putrid or putrescent matter, by-

A Removing the patient from places filled with corrupted air.

B Correcting the air from which he cannot be removed. (9)

C Avoiding the accumulation of the patient's own effluvia, by

a Constant ventilation,

b Frequently changing the bed cloaths and body linen. (10)

D Removing carefully and speedily all excremental matter-

E Avoiding animal food, or correcting it.

2 Evacuating the putrid or putrescent matter already present in the body, by (11)

A Evacuating frequently the intestines. (12)

in one day - In progress of debility sh?
be given cautiously - where great sickness
prevails may be given at any time
especially in bilious fevers. A Vomiting
when troublesome cured by Blisters. Quinine &c
1st, Bark & wine & Bitters - Porter
1st, doubtful. -

(X) The convalescent state of febrile &
malignant fevers often dangerous -
swelled legs ^{Vomiting - Incontinence} weakness - anorexia &c
follow - hair fall off - or turn grey -
Porter - Chapman's tincture -
Porter - & Chocolate proper moderation
in every thing from Decid? of the system. -
A Resolution in the case of fevers -
owing to Dist. Int. Opium - wine
Bark &c.

a curious fact! putrid fe:
- vers in Russia &c cured in after
long & cold winters - Dr. Goulden - &
Capt. Warden - owing to cold acting as
a sedative as well as heat. Its effects
of same as ~~is~~ on the complexion &c.

19
3 Supporting the excretions of perspiration and
urine, by -

a Diluents,

b Neutral Salts.

3 Correcting the putrid or putrescent matter
remaining in the body - by

A Diluents

B Antiseptics, &c.

C Fixed Air, &c.

4 Resisting farther putrefaction, or obviating
its effects. by -

Supporting the tone of the vessels, by

Tonic remedies. x

are all putrid diseases from one orig^l
contagion. —
fasts make it prody life.

Means of preventing from

1 Heat - 2nd Rest - Synocha &

Uphus sometimes alike In these

Many other diseases. Delay neurop^y

Some Diseases like plants do not put
on y^r characteristic marks for some days

Sprain -

Bark: tar & V a p a:

Cynanthe trachealis

called Croup - by Hoene

Angina polyposa - inichialis Suffocatione

Stridula - monoe. angina suffocativa - Bard

Hoene - from heaves - Bowels ~~heaves~~ or heaves

Disputes abt: Clap it belongs to - Is it inflamⁿ?

not often - fever what little attends generally

typhus mitior - sometimes is attended wth inflamⁿ

symptoms. Dr. Monroe places it among Epistaxis

Exacerbationum suppressiones - Perhaps it belongs

to three claps. monoe - Phlegmasia & spasmic

a second dispute - is it from spasm - or effusion
in the trachea - from both - This species two varieties^{ty}

1 Spasmodica & 2^d Hemorrhagica or catarrhoides

I have long thought so - The idea lately adopted by Dr. Johnston

I prove it from dissection.

The spasmodic known -

1 By coming on suddenly especially after first

sleep in the night. 2 going off suddenly. 3 requiring

to antispasmodic - as ~~some~~ warm bath.

4 coming on periodically - especially at night

Cure-

1. During the night, the patient

+ Some children, & even families subject to it.

Cure

1 Bleeding if in inflamed season or constⁿ
or symptoms. 2^d Emetics. 3 antispasmodics
as warm bath - opium & asafetida Blisters
& 4 stimulating Cataplasms to the feet. -

Humoralis or Catarrhalis.

The Cough or Carking the same as in Spasmodic
but 1 it comes on gradually two or three days
2 goes off the same — appears in malig^{ne}
— Scarlatina - measles & small pox.
3 continues with uniformity.
4 Does not yield to antispasmodic medicines.

Cure

1 Emetics & Calomel. Both act in the same way.
3 Bleeding if Phlegm^a: 4 Blisters. This disorder
among Adults, is however & carking continue
After danger Cynanche Pharyngea
is over. +

The same as Trachealis, & requires
the same treatment especially blisters.

Gastritis

From cold ^{drinks} ~~water~~: Three circumstances
must concur. 1 extreme heat in
the body. 2 coldness in the liquor, & 3^{ly} a
large quantity must be drunk. —

Symptoms - weakness - giddiness - ~~fever~~
in the stomach - ~~frigor~~ - spasms chronic
& tonic - death. —

Cure

Liq: land: in large doses - emetics &
bleeding harmful. - After violent
symptoms abate gastritis comes on.
cure 1 V.S. 2 Pylasters. 3 Blisters
4 Diluted acids - 5 demulcents &c.

Enteritis

The same as Gastritis

From July 1st 1758 to July 1. 1760
out 5th 1743 patients 360 Consumps^{ns}
in $\frac{1}{4}$ of whom owing to falls - bruises
Strains &c which gave no Uneasiness
for 2 years - produced ^{general} debility which
ended in suppuration & death

HepatitisLiver subject to diseasesacute & chronic - slow, or latent
in warm climates. Balfour.inflammation often discovered by
gangrene & suppuration after death,
in parts where no pain attended.

- pulse only indicates it - th? be
chiefly attended to. I have often pro-
nounced an internal inflammⁿ to
be present from the pulse several
days before it shewed itself. This is new
law in the dysent^{ery}. Pain from stone
in the bladder ~~is~~ is felt first in
the glans penis. Vomiting first
indicates the presence of a stone, or a
disease in the kidneys. Baglivi's
fact of a stone in the opposite kidney
where the pain had been felt.

It is that the chronic affects
the parenchyma, while
the acute affects the membrane.

\$ One drop of blood from the nostril taken notice off by Hippocrates - Shows the connection between the nose & liver. —

+ 10% used in East Indies - ~~inter~~.

seasons of the year.

++ & affects even the ~~eye~~ ears &
eyes - Col. Adams & M^r Mitchell.
- The light of fire in the cold
weather of 1789 Feb: was so pain-
ful to his eyes, ⁺ he preferred
lying in the cold. -

+ Gout infects whole families -

M^r Ralph - of London - had one Daugh^r
by a ^{wife} ~~woman~~ in Milan^a when he was
young - By a 2nd wife in London he
had six children - all of whom except
one died single - One at 14, & one at
16 years of age - ^{with the gout} He & his father died
with the same disorder. His Eldest

Daugh^r M^s Garrick (born probab:
- by ^{father} before he had a full of the

32. Steady

unknown in warm, & cold climates. Artificial teeth have no natural communication th to the jaw - as Bein's Exp² with a dog, & the manner in which the rot first decays prove. A dry tooth would ~~prevent~~ ^{therefore} anomer best - would prevent probably th inflammation & running in have been mistaken for ven. infection & lost on as well as cured by fright, as in Gen^l Nevil's case. Quint

Regular tonic - atonic - re-
-cedent & misplaced.

For symptoms - see Hydræmia
& various - It occurs every part
of the body & counteracts every
disease - such as Gonorrhœa (from M. Bell)
& will the scrophula - affected by Protoplasts in
Adema called dropsy ^{very common}
mistaken for dropsy.

Gout (ind) between 60 & 70. all
her children have the gout.
Often passes by children & appears in
grand children. -

+ Long rest - debilitates ^{the} system
& when taken on the back disposes
to the gravel - The owner therefore the
patient is placed on his feet - the
better - hence the use of blisters.
Mr Small tells he walked early after
a fit of the gout even while his
feet were tender & found benefit
from the practice - probably from the
reason above mentioned Sydenham
commends it.

^{Obstinate}
The pains over the eye - & obstinate
headachs I believe are often Gout. - cured
in And Hartrog (viz: a pain over his
eye) by cured by an issue after
trying bark & many other things for
11 years to no purpose. -

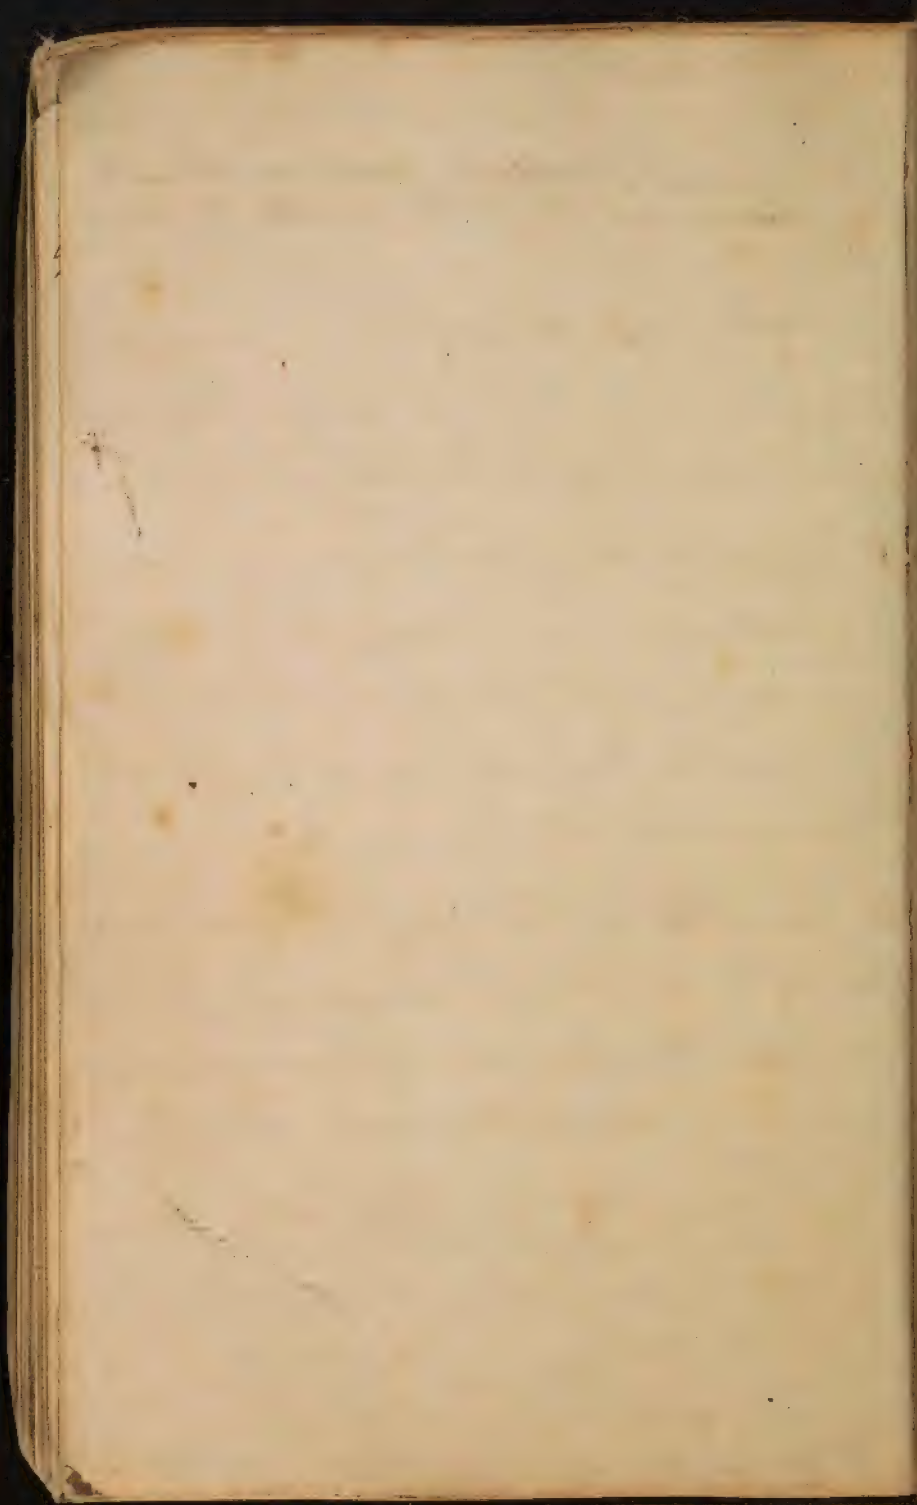

Mr Insensel's case of head ach
cured by rubbing threes -

Old Dysentery is frequently no-
thing else. Suspect Gout in adults
as worms in children in all chronic
diseases. 1876

1 Under 35, or 40 years when
tonic it may be used radically
not by medicine. but by ^{low} diet - and
labor. I have known two cases
of radical cures of Gts. for many
years & Paul took from the low
diet of a prison, & a subsequent
temperate life.

 to use animal food moderately,
 if that boiled be wild. 4 to drink
 no red, or low wines - or cyder,
 but ^{old} Madeira or Cherry ~~at~~ moderate-
 ly. Less danger of intemperance
 from the use of these wines.
 5 To cross the exercise of walking
 6 To keep the bowels gently open
 with Warner's Lincture.

Arthropreeosis

Two cases fatal - Mr. Marshalls &
 Miss Morgan - This used Capt
 Mendenly, & Mr. Wescott by thorough-
 = root or trifolium called in many
 = land cow-tongue & used there to
 cure the intermitting fever.

Order. Exanthemata

Varicella - moved by motion
 propagated by smoke - up chimney
 Variety in the number of days in
 sickness from 8 to 20th - in eruption
 & in the burning of the pox. - see Syden.
 - ham on the variol. fever. -
 - Can it be extirpated as proposed by
 Hillary & Boerhaave? I have often
 mitigated it by large doses of Sweet Meat.
 & Calomel: given during the eruptive fever.

The fever is either Synocha Synochus
 or Typhus, and must be treated acc-
 -dingly. -

Death often bro't on by Dyspnea
 from clammy viscid mucus &c. in
 the lungs & trachea during the ^{very} fever.

- It may be prevented by giving
 Calomel for us to excite a salivation
 just before during this stage of the
 disorder. - highly useful in this disorder &
 variol. fever of Debilium 141
 never be given likewise
 in this stage of the disorder, &c

+ & a dull lancet by exciting too
much
inflammⁿ: throws out the infection

a revulsion from the breast excited
by emollient cataplasms to ^{the} hands
& feet, & by blisters.

To prevent pitts - the pustules sh^d
be opened on the face.

Purges sh^d be given after all the
pusk fall off - - Infection not de-
stroyed by fire - cloaths sh^d be
loosed - prostration

See Cullen & pamphlet de.

I have only to add to it - if a deep
or large puncture often prevents
infection by too much blood following
wh^{ch} washes it away - also that matter
from a puncture on ^{the} arm of a child
infects - ^{where the child is not infected.}
Relicula

Vegetable & milk diet - an excellent
progenative.

The pneumonia & catarrh to be
treated by V.S. - Spiritus. Dermal.
- cuts & blisters.

After ^{an} experiment, I am sure
a moderately warm regimen

is most proper in this disease,
owing to inflamed state of the lungs.

To prevent febrilis afterwards
with a vegetable diet necessary.

Bleeding improper afterwards
as in all diseases of the lungs. The
determination should be kept up to
the skin by warm air - flannel &c.

Is there any advantage from
Inoculating for this disease? - No
- Sore soon very common.

Scarlatina

It is distinct from Erysipelas ma:
- ligna. I have once seen it epide:
- mic without sore throat in 1763-4.

It frequently without it within
those 3 or 4 years. - The Sore throat
is symptomatic - ~~the~~ It occurs
in the typhus according to Monro.
I have seen it in the army & bubas.

+ Blisters useful - contrary
to Wehmering - Bark has effect
agreeable to D^o - may not all
putrid diseases like the human
Species have been originally One
& diversified by Climate & State of
Society. It differs from maligna
in the color of the skin being more
red - & the skin itself more smooth.
Perkins.

The Scarlatina is a compound of
Athenia & Themia. The maligna only
the latter. - hence Bark improper.

It is true we sometimes find it attended with some ^{of} the symptoms of maligna - But we find instances too of maligna - having all the symptoms of inflamed Angina - & yet who would call it by that name?

For the history & cure of this disease see written acc^t - +

Scorbut

Unknown in British Dominions for a century - owing to the use of Sugar - wine & vegetables -

Not propagated to a great distance nor by contact, without the medium of ~~linen~~ cloaths. Naked dead bodies handled with safety.

Spices & lozenges often prevent it - also washing the hands & face wth vinegar.

See a Sadler's acc^t of it in the reign of Chas II - and in Massieu 1724.

& Howard's late work. Top of memory as in Sydenham follows it according

to the dead - Birds & beasts who
eat the flesh of persons who died
with the plague died of it. all
obedient to the laws suspended
- being to good & bad dying, & none
expecting to live to be punished,
according to Dr. Very diff. in
London among X^{ns} - all fed
to the churches & according to Adler.

See Vanowieten Vol. 16 p 13

checked at Verauw by
an earthquake - by the bridge
at Inselle & Vienna. -

& Tobacco - the last only by
strong faith in it - Diemer-
brock saved by it.

Infected foot & hand first
19th of crush 25 years -
Unwritten.

No fever or chill precedes
in typhoid deaths.

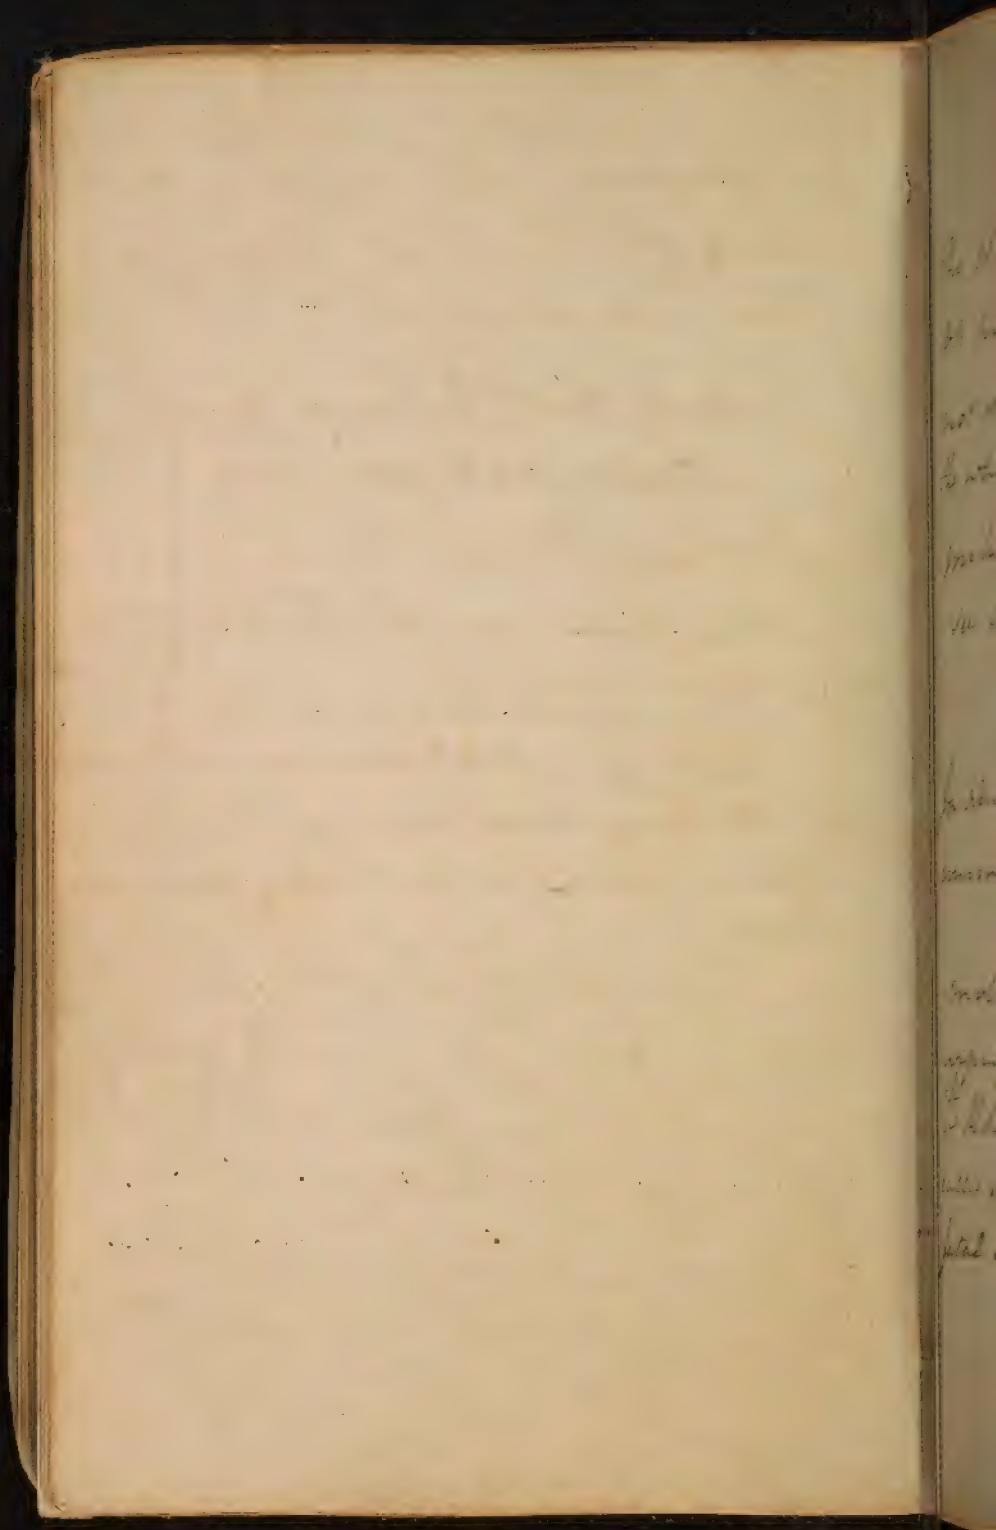

Simulants dispose to it.

Bleeding & ad delirium - standing
in the Army cured many, none died.

Hydemia: always &c before sores &c
begin.

Prevented by sugar -
Leaves a malarious malarious fever
behind it. Erisipelas a little like it,
& many other fevers.

Uncleanliness in air - persons
who escaped it very healthy.

Erysipelas

The 11th Species - Rings - caused by
 O. purges & sedative liniments. -

not dangerous when it circulates
 the whole body. -

milium - Verticaria - Erythema
 see Erythema.

Aptha

In adults symptomatic, in children
 common - perhaps from meconium
cure

molasses & water - Borax -
 wiping frequently & gentle purges
 in Rheumatism - sometimes fatal
 called in newfortk Pore. Always
 fatal in the close of chronic diseases,

+ Arterial Plethora - hemorrhages
nose &
from lungs - venous - from
hemorrhoidal vessels - brain.

Menses both. Dr Brown says all
from debility, - most common
in civilized life - perhaps 1st
indirect 2nd direct debility.

Hemorrhagic

Divided into active & passive - the
 seated in the Arteries seated in
 the veins. -

1. under 36 - the 2nd After it. From 30

to 40 system variable owing to struggle
 between arterial & venous plethora.

some headach. - piles - Dysmen-
 +
 Dyspepsia - The system varies also

in both sexes at puberty - some pains
 many where spine in the breast & joints.

Often increased in boys by Onanism.

- vide morphy - *Ann.* Vol. 11 - p 311.
remorse

Besides the causes mentioned in
the syllabus - one from snuff.

In Dr Pringle's case related by
Dr Franklin - Tremors very com-
- mon the Dr says in some from
this cause. (a) also from strong tea.
Cure

Avoiding the causes, & cold bath.

2 Is offensive to those
one wants success & prosperity. 3 Is expensive
who don't use it. 4 Destroys the teeth & short-
-ens life of money & time. A great sufferer
who takes a pinch every 10 minutes (each of ~~the~~ ^{these} ~~times~~ ^{times} a minute)
loses alone an hour every day in
raising his hand to his head - and
spends 15/ a year in Snuff. The amount
of time lost in 50 years is 2 years 60
days 10 hours, & of money ^{spent} in the
same years, 100 dollars. Add to the
principal of ~~that~~ ^{this sum} ~~15~~ ^{each} year the
annual interest, and the amount
of the principal & interest of the value
of the labor lost in 2 years 60 days
& 10 hours, and it will make a sum
large en^o to build a church - support
a free school - or if more selfish & pious
guide us - large en^o for a handsome
fortune for a wife or daughter.

4 Is a ~~trouble~~ ^{trouble} to fashion - & study
& ~~cost~~ ^{trouble} all lead to it - Dr
Franklin has known ^{them} all, &

Asmentia +

Connected with softness of the brain,
 while great understanding & madness,
 with solidity. - This disease not beyond
 the reach of medicine. If faculties im-
 paired by medicine (as Stramonium)
 why not improved by it? Storck's facts.

Different degrees of fatuity, as of
 loss of judgement, ^{or} ~~and~~ memory ^{or} moral
 faculty - or all - in which consist
 its most melancholly degrees.

Conversitacure

1 Cold Bath. 2 exercise. 3 Tonics. -
 4 Accidents affecting the body which move
 the brain into action - as Dr Priestly's
 child of 4 or 5 years old cured by a
 fall which bruised its head, and
 Dr Monro's daughter cured by
 a burn. - both idiots. Dr Lalande

Polly - lost her reason &c.
+ Wm Fennent at 19 years of age
in a supposed trance lost his
memory - began to learn over
again - while learning suddenly
all came to him again.

Senilis

This species more common among the ignorant, than the studious and literary - more common among the country people who when they are unable to work, have nothing to employ their minds, than among citizens. Dr Johnson's part of Dr Swift. lost his intellects from his avarice, which prevented his seeing company, & from having made a vow never to use Spectacles by which means he lost the opportunities of renovating old, or acquiring new ideas. Business, & books & society - then ^{are} the best preservatives from this species of fatuity. Auth^r: Benet's consolation from loss of memory. - Acquisita

Frequent after fevers, cured by cold bath & exercise. ^{especially propele} Dr Seltzer - Mrs Dunlap - Miss Rhea's case 94 years old.

When does it begin in children? Dr
Moyse remem^d. a Cow & a plaid - lost his
sight at 18 months. See Shakespear's tempest

p: 10 Prospero's speech to Miranda his daugh^r
who tells her y^e she came into y^e enchanted Is-
land at 3 years old

" By what? By any other house or person?

" of anything, the image tell me, ~~but~~ kept that

" kept with thy remembrance. ^{I remember myself - 3 years old at the time}
+ a wonderful power of recollecting

past events - The Deity the same
power gives future -

+ very low in savages - Their
mode of retaining speeches in
their treaties - ^{council} ~~exist~~ fires.

these

may not exist in the memory a pre-

-cursor or instinctive principle w^{ch} serves
the same purposes as
~~is analogous to~~ taste does to judgement,

& the moral faculty does to conscience.

In visiting my patients, if I try to
recollect y^e I can always tell when
I ^{am} forgetting any one of them by

a tumultuaria - very common -
hence perhaps the Spanish custom
of not admitting a man convicted of
drunkenness as a witness in court.

a pathemate - all violent passions
weaken the memory especially grief.

Heaviside On the memory - D^r Read's
remark on it. + \neq X

Different species - 1 for words as in
childhood - and among players. 2 Names
as Cyrus - mithridates. 3 Numbers - as

Jedi Buxton the ditcher - & Old Isaac Jones &
Jas Logan - see Other Side -

4 Ideas. The perfection of memory con-
sists in preserving all fact. But most men
want one or more of them. D^r Richlet's

no memory for numbers. D^r Lardner's
none for Names - Gairner forgot the
name of his father in law. -

Mr Davis - none for words. memory
first fails for words - then names.

It is impaired by 1 intemperance in
eating & drinking 2. Deep sleep & weariness.

a feeling which seems to draw me
to the places where they live. ^{or disgusted} While
was once distressed at seeing Cha Biddle
came
foot on a chair without recollecting
for a great while ^{that} the cause of this dis-
-gust was he had once seen Genl.
Arnold ~~of~~ (whose name he detested) put
with his foot in the same position.

The long dormant, or forgotten facts
ⁱⁿ are often brought to light by opporation,
^{or latent}
show a secret memory. —

Dr. Franklin May 26. 1789 informed me
that old James Logan by a stroke of palsy lost
his memory for the names of all his friends,
but used to call them by their ages, ^{he} which
previously learnt. He would point to
books in his library, & tell when they were
printed & the sum they cost. To all subjects
except to ^{or memorial} ~~remember~~ his memory was
totally lost. — Mr Bordinot, ^{case} invol.

Mr Carey informed me y: he could
never remember the difference between

~~knowing the time~~ ^{knowing the time} ~~and~~ ^{and} ~~cannot~~ ^{cannot} how to wind up a
watch. — Dr. Hesse Dat. & all plural alike.

+ Scd: Willis: Aut: of Prognosis of
George 3rd case in a news paper -
presumed be. Dr Baker pronounced
~~that~~ the king's recovery certain, as soon
as he recovered his former rapid habit of
speaking. See Sydenham ^{to 6} p: 71 - mad.
- raps from Astoria cured by ferals
Dr A: Luthergill - raps herid 4th
madness seldom cured - cured
two cases by Hyoscinum.

Two general Species. Tonic
 & Atonic - or melancholly &
 saving madness of authors.

Cure of Tonic

- 1 Ves. ad deliquium. 2 purges. 3 V₂ =
 mits. 4 Blisters. 5 The clay cap
 or cold Vinegar to the naked head.
- 6 Labor - Dr Gregory's fast - any
 thing w^{ch} will fatigue. 7 Low diet.
- 8 ~~Warm~~ ^{Warm} bath. 9 Confinement.
 10 music & soap case - ~~negative tones~~ 11 -
~~loquacious~~. Cure of Atonic +

1 Blisters as Stimulants 2 Vomits
 but chiefly 3 exercise & such things
 as rouse the system. Helmont's
 feat of half drowning - confirmed
 by Carvers of the Indian midwife,
 so as to produce convulsion &
 violent exertion. The hot & cold
 Bath in succession - 4 pure
 Air - ~~not~~ no Cells. Heri I add

O Dr Swift had a temporary return
of his reason from a large Abscess ⁱⁿ
his eye. Dr Johnson. Is it the
pain does good ~~you~~ here? If so -
would not artificial pain do service?
+ Dr Hunter cures madness by
gentleness - mixing madness w:
his family &c. good! -

After treating of the disorders
of the ^{Understanding} ~~passions~~ next of the
Passions - Fear - Grief - Lust
Lust ⁱⁿ leaved by Dr Stahl by a diet of
bread & water - increased by a
milk diet. & still more by 6, or 8
Ounces of roasted goose every day.
by increased by indolence - in
1 Cities of the plain. 2 in mountains.
3 Hippocrene: 3 ^{as} weavers - women
+ forbidden to weave on 4 festivals

a few facts. a Typhus once
 cured most of the maniacs in our
 hospital - an ingenue did the same.
 Douglassville rec'd in his last sickness -
 three instances of large abscesses the
 same - may lead to important
 conclusions. - Black Sam's case -

came to his house three days before he
 died. Had an abscess in his side. Dr. Manly
 treated by pressing the carotids. + 50 opium
 6 Lodg. Dr. Smith's case 7 three pusious
 troublesome dreaming, & night

walking prevented by previous
 labor 2 By avoiding heavy supper,
 & when in the habit of supping, by
 avoiding going to bed empty. -

perhaps by anodynes. Prentiss
 prevented by lying on the side.

Applications to the belly. -

Ischuria

King of Prussia's remark. —

Calculi of a solid acid nature proved
by Scheele. chiefly all species from them
Martens's remark — a noble, &
dignified disorder. —

1 Alkalies - best Sal. $\frac{1}{2}$ $\frac{1}{2}$ pyrom.
water by Coh. i. - is - vel iij ter die.

2 Strong ^{of trituents} ~~acids~~ - as Uva Ussi - Bark -
absorb acid of stomach - Cullen & Bark -

3 Wild Canot seed tea & avoiding

- 1 Costiveness - 2 lying on the back -
discharging the Urine in a lying
posture - perhaps this ^{one} the reason
why gouty people are most subject to
Gravel 3 A sedentary & studious life
which shall preclude discharging the
Urine - hence Judges & Clergymen
most subject to it & standing too
long - hence the Attendants on the
King of Spain ^{very} ~~most~~ subject to it.
5 riding / under certain circum-
stances on a trotting horse &c.

✓ Scarc of the Stimulus of love & goodness
debility & Obstrⁿ as well as a defic^y
of that Stimulus. —

from Gout — cured by Blister
Clark

+ Wilkey's case.

† cold water every morning and
evening. This cured Mrs. Kain by
discharging large quantities of gravel,
after she had laboured many years
under it. She first prayed that God
would direct to & bless a some remedy
for her recovery, & soon afterwards met
^{an aut. of} with the above remedy in a news paper.
~~Mrs. Kennedy~~ relieved by the same remedy.

Mrs. Rop & Jos. Bullish. rel^d by Discharge
of uric acid — Mrs. Wittberger's case from
Gout.

One or two eruptions. 6 Malt Liqueur
Porter perhaps excepted.

By
5 Exercise that moves the muscles
of the back. 6 cold draught of water
twice a day. 7 eating a biscuit early
in the morning - here perhaps the
Sativa performs the cure. 8 tropical
cold bath + Palliatives. 9 Drinking +

1 opium 2 warm bath 3 catheter
4 onion - 5 pillule of egg lying till it dies.
amenorrhoea on penis.

see cause of menstr in Brown V
not to be attended too in acute
disease - is a chronic disease - hence
whit. seldom cures. Ann Woods
case menstruated till 80. —
Cure

1 Stimulants - as 1 Steel. 2 bitters.
3 L. 4 purges especially Aloes.
2 Exercise. 3 matrimony. 4 Case of iron.
- perforated hymen. 5 Electricity - by
J Durcan. Dysmenorrhoea

th. in the paroxysms & tonics as
above in the intervals. Directions
how to treat women at the cessation of
the menses - see Gohensill

Cancers

Often general - no cure
 when topical - the knife &
 caustic - the topical chiefly on
 limbs & face - the general - on
 breast - neck - & lips. The knife when
not ulcerated - the caustic - when
 ulcerated - Chronic best. - humors
 grow acid in old age - hence old men digest
 hard food so easily. Best

Cure
 by Caustic.

— Brachyocle,
Lupia - caustic Hydrastis -
Blisters Ulnaris Ramby's

rule - & bark in gunshot wounds.
 Col: Walton took bark in 6 weeks after
 a wound w: broke his thigh. -

Ulcers

cure

correcting the habit - by diet
 bark - & canot poultice -
lose lies confined to urination -
short

connected with acidity - crust, $\frac{1}{2}$ -

2 ^{as} Iodacetic - Arsenic - vit. non ac.
